**Re: Proposed California Amendment to Bridge to Health Reform  
Demonstration (No. 11-W-00193/9), Drug Medi-Cal Organized  
Delivery System Waiver**

Dear Ms. Garner:

I write on behalf of the 396 patients who receive substance use disorder treatment services at our opiate treatment program located at 1310 M Street, Fresno, CA 93721. We are strongly opposed to sections of the California Bridge to Reform Demonstration (No. 11-W-00193/9) Amendment for Drug Medi-Cal Organized Delivery System Waiver, submitted by the California Department of Health Care Services. Our concern, based on 7 years of operation, is that waiving federal access protections and granting Fresno County authority to establish reimbursement rates will result in decreased access to critical, life-saving treatment services.

Specifically, the current proposal will waive beneficiary freedom of choice, equality in amount, duration and scope, state wideness and reasonable promptness, some of which form the basis of a lawsuit 20 years ago called *Sobky Vs. Smoley*. Before that lawsuit, Fresno County limited access to our services by limiting DMC slots and funding. After the lawsuit, the county complied with the permanent injunction and entered into direct contracts with providers. As a result, significantly more people have entered treatment and beneficiaries can access medically-necessary treatment on demand, without the waiting lists that

Where Change Begins

were standard practice before the lawsuit. This waiver is likely to overturn that lawsuit and cause California and Fresno County to regress back more than 20 years. We ask that CMS **NOT** do anything that may undermine the permanent injunction that was based on overwhelming evidence of county efforts to limit access. Instead, we suggest CMS require California to carve-out opiate treatment providers from this waiver. Such carve-out will not preclude Fresno County from contracting with our program and offering OTP services to residents of Fresno County.

MedMark Fresno currently serves 396 patients. Majority of our patients are from low socioeconomic background. 93% of our patients are depended on Medi-Cal for OTP services. Waiving federal access protection and granting Fresno County authority to establish reimbursement rate will result in decrease access to these service. Health care reform (the Affordable Care Act) has significantly increased access to OTP services. This waiver will undermine the intent of the ACA. MedMark Fresno has been involved with Fresno County, Fresno County Alcohol and Drug Advisory Board, and various community providers to discuss and address our concerns.

Section 7. of the state Financing of the Special terms and Conditions says counties will propose county-specific rates and the State will approve the rates. This will affect access and result in denial, delay, and limitation of services when rates are insufficient to attract sufficient providers to meet beneficiary needs and demands. This provision will also result in unequal treatment of beneficiaries based on the rates paid in different counties. Furthermore, the counties have proposed reverting from the current fee-for-service system to an antiquated cost-reimbursement system. The current system provides incentives for efficiency and aligns payment for services with evidence-based services, ensuring the best possible patient outcomes. Cost reimbursement, on the other hand, rewards inefficiency and greater costs with no connection to outcomes. That is why Congress and most every other payor has moved away from cost reimbursement systems.

In summary, MedMark Treatment Centers-Fresno West, Inc. requests that narcotic treatment programs be exempted from the Organized Delivery System waiver for the above stated reasons.
